Build Your Treatment Plan

Choose your treatments below to get a clear quote estimate. Your final treatment plan will be confirmed after your chosen clinic has reviewed your dental information. Payment is only made in-person after consultation at the clinic.

Cost Comparison Summary

See how much you could save compared to UK dental treatments

Estimated UK Cost

£874

Estimated UK Cost

Estimated Istanbul Price

£306

Save up to 65% compared to UK

Hotel stays often included in treatment packages depending on the cost of your treatment.

Your final treatment quote will be confirmed by your chosen clinic after they've reviewed your dental information — including any X-rays, CT scans, or images you provide. Each clinic has its own pricing based on the materials they use and their treatment approach — these details will be discussed with you directly. Please note: Payment for treatment is only made in-person, after your consultation and examination at the clinic — ensuring the treatment plan is accurate, suitable, and fully agreed by you.

English 🗸

Dental implants are titanium posts surgically placed into the jawbone to replace missing tooth roots. They provide a strong tion for fixed or removable replacement teeth.

https://www.mydentalfly.com/your-quote 2/8

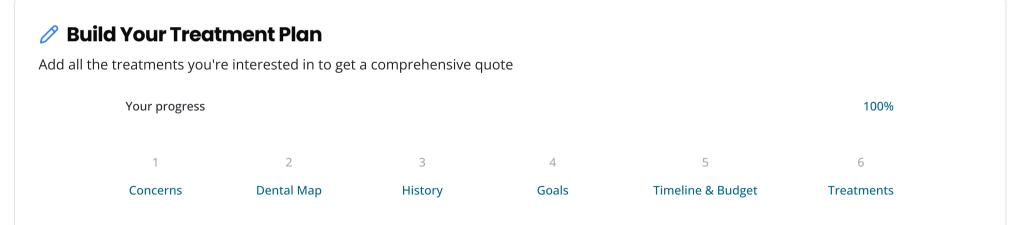

① When building your treatment plan, specify the number of implants needed. An average full arch replacement requires 4-6 implants, while a single tooth requires just one.
